October 10, 2025: On Personal Notice to Elon Musk to Leave our Home

Elon Musk:

Please leave my home. I am not a supporter of the Republican Party and I firmly oppose the granting of public-private contracts to businesses in general.

Now that I have learned about your family history and the ways in which you are presently living your personal life, I am firmly opposing grants to businesses that are governed by you as well.

I am firmly opposing each and every contract that the United States has provided to you and every dollar of funding that you have grifted from the American taxpayer.

Please stop attempting to 'drive' political ideologies into our home through your spy-technology conspiracy which is presently 'lording' itself over Texas citizens.

Elon, you have proven yourself to be exactly what you portray yourself to be -
a partisan technological villain that is abusing American citizens while being funded by the American tax dollar.

I do not agree with you personally or politically and no amount of agitations or oppressions will ever change my mind.

Please remove your body of evil from my life and move on with your own.

We have no connection. We are not consulting one another for political ideologies that are 'best' for the people of America.

You are a villain that is abusing your power.

I am an innocent victim of your harmful ways of life.

I am presenting this letter to you as a formal request to leave our home and to stop spying upon our life.

We do not support you. We do not support Donald Trump, and we do not support the American military in general.

I find each and every one of you to be repugnant to my moral values and I am advocating for shrinking each of your over-inflated budgets and egos.

Thank you for your attention to these very important matters.

Kindest regards,

Chris Noel Carlin
